

Open Shelf Filing Equipment - Divider Type - Legal Size

Equipment Needed For Plan 1 or Plan 2

Initial Double faced Units	2 each
Additional Double faced Units	5 each
Single Faced Unit - To be attached to one end of double faced unit	1 each
Double faced End Panels - Right End	2 each
Double faced End Panels - Left End	1 each
Single Faced End Panels - Left End	2 each
Receding Reference Shelf For Double faced Units	4 each
Top Plate or Dust Canopies	15 each
(See attached floor plan for location of Reference Shelves and placement of 1 single faced unit)	

1. Equipment is to be assembled and installed by the successful bidder to form 1 range of 4 double faced sections and 1 range of 3 double faced sections with 1 single faced section added to the left end of the double faced range. Dimensions: height of uprights to be 83" to provide a 3 inch base elevation and 7 shelf openings of not less than 10 $\frac{1}{4}$ " from the filing surface of one shelf to the lowest projection of the next higher shelf or the dust canopy. Filing capacity of each shelf is to be not less than 34 $\frac{1}{4}$ " when equipped with 5 removable shelf partitions. The dust canopies and end panels are to be attached in a manner not to interfere with the normal operation of the equipment.

2. All shelves are to be identical in each section with base shelves 15" deep and adjustable shelves 12" deep. The shelf back shall be approximately 5" high. The receding reference shelf is to be installed on the section as indicated on the attached floor plan and on the underside of the fourth filing surface. Units of shelving are to be crossed braced at 5 foot intervals as a safety feature.
